### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a method of producing a photochromic, transparent synthetic resin body composed of at least two interpenetrating polymer networks of different polymer materials and at least one photochromic dye, wherein said dye is homogeneously distributed therein. Nor does the prior art teach or suggest a photochromic plastic object comprising a transparent synthetic resin body having at least two interpenetrating polymer networks of different polymer materials and a photochromic dye homogeneously distributed that can be introduced by a mass dyeing technique, particularly, wherein one of the interpenetrating polymer networks is composed of polyurea or polyurethane and the other is composed of polyacrylate, polymethacrylate or a mixture thereof.

The closest prior is FR 2,674,529 to Guy; USPN 5,886,101 to Sommerfeld and USPN 6,498,218 to Barrera, all of which disclose interpenetrating polymer networks that may contain a dye. However, neither reference teaches nor suggests a method of forming a photochromic/transparent object having a resin body containing interpenetrating networks having the dye homogeneously distributed therein; wherein the dye is introduced by a mass dyeing process; and/or wherein the interpenetrating networks are composed, respectively, of a first polyurea or polyurethane network and a second poly(meth)acrylate network.

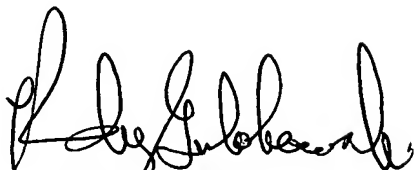

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
